Perspective & Floorplans

Duplexes

Origami's Lilly Apartments unveil a unique cluster of multiple flower folds to introduce a spacious living experience in the form of expansive duplexes as grand as your imagination. Starting from 80m<sup>2</sup> to 226 m<sup>2</sup>.

A bird's eye view of the Great Pyramid of Giza during the Equinox shows that it actually has eight sides instead of four like every other Egyptian pyramid. That is to say, that its four sides are hollowed in or indented along their central lines, from base to peak. Inspired by our glorious history and ancient Japanese art, Origami unfolds a new era within Taj City, offering beautiful homes to behold.

The image depicts a dark, geometric interior space, possibly a modern architectural installation or a stage set. The walls and ceiling are composed of large, dark panels, some of which are illuminated from above, creating a dramatic play of light and shadow. A prominent feature is a large, dark, angular structure that dominates the foreground and middle ground. In the background, a wall is made of vertical panels, and a spotlight illuminates one of these panels, creating a bright, circular glow. The overall atmosphere is mysterious and contemplative.
